

2019 Hospital Compliance Assessment Checklist

Joint Commission Resources Mission

The mission of Joint Commission Resources (JCR) is to continuously improve the safety and quality of health care in the United States and in the international community through the provision of education, publications, consultation, and evaluation services.

Disclaimers

JCR educational programs and publications support, but are separate from, the accreditation activities of The Joint Commission. Attendees at Joint Commission Resources educational programs and purchasers of JCR publications receive no special consideration or treatment in, or confidential information about, the accreditation process. The inclusion of an organization name, product, or service in a JCR publication should not be construed as an endorsement of such organization, product, or service, nor is failure to include an organization name, product, or service to be construed as disapproval.

This publication is designed to provide accurate and authoritative information regarding the subject matter covered. Every attempt has been made to ensure accuracy at the time of publication; however, please note that laws, regulations, and standards are subject to change. Please also note that some of the examples in this publication are specific to the laws and regulations of the locality of the facility. The information and examples in this publication are provided with the understanding that the publisher is not engaged in providing medical, legal, or other professional advice. If any such assistance is desired, the services of a competent professional person should be sought.

Introduction

The Joint Commission accredits and certifies more than 21,000 health care organizations and programs in the United States—with more than 4,000 of them hospitals. Joint Commission accreditation and certification is recognized nationwide as a symbol of quality that reflects a health care organization’s commitment to meeting certain performance standards.

The Joint Commission accreditation process is data driven and emphasizes continuous improvement and ongoing standards compliance. The accreditation process can therefore be used as a systems improvement and management tool that enables health care organizations to embed processes that promote compliance, safety, and quality into organization operations.

Purpose of This Book

The *2019 Hospital Compliance Assessment Checklist* is a self-assessment workbook designed to help you maintain continuous compliance. This easy-to-use workbook can be used both by staff new to the accreditation process and by those experienced with accreditation to assess standards compliance at the level that is most appropriate. With its targeted assessment prompts, expansive compliance checklist, multiple worksheets, and mock tracers, this book helps in the following ways:

- Engages staff and leadership in accreditation activities with simple questions, checklists, and tools
- Helps you identify deficiencies and then plan for addressing them and sustaining improvements
- Improves your understanding of what tracers are and how to plan for and conduct them
- Better prepares you for your next unannounced survey
- Reduces anxiety about the survey process, which will allow for a more relaxed and beneficial on-site survey

Project REFRESH

Recent editions of this book have reflected The Joint Commission’s revised approach to identifying and communicating risk levels associated with deficiencies cited during surveys. Through Project REFRESH, a series of process improvement projects, The Joint Commission has examined various aspects of pre-survey, on-site survey, and post-survey activities. Its goal is to simplify these activities, enhance their relevance to accredited organizations, increase transparency in the accreditation process, and implement innovative approaches and technology to enrich the customer experience.

Two of the major improvements resulting from Project REFRESH are substantial streamlining of the hospital standards and elements of performance (EPs) and development of the Survey Analysis for Evaluating Risk® (SAFER™) approach.

Streamlined Standards and EPs

As part of Project REFRESH, The Joint Commission evaluated standards and EPs to modernize, streamline, and consolidate requirements spelled out in the *Comprehensive Accreditation Manual for Hospitals (CAMH)* and its corresponding online E-dition® version. The EP Review Project was conducted between 2016 and 2018, with final changes becoming effective January 1, 2019. The table following outlines the total number of EPs before and after each phase.

<i>CAMH</i> Chapter	Number of EPs Before Consolidation	Number of EPs After Consolidation
“Human Resources” (HR)	41	31
“Infection Prevention and Control” (IC)	58	48
“Information Management” (IM)	22	17
“Leadership” (LD)	168	136
“Medication Management” (MM)	143	94
“Nursing” (NR)	21	14
“Provision of Care, Treatment, and Services” (PC)	210	199
“Performance Improvement” (PI)	31	30
“Record of Care, Treatment, and Services” (RC)	45	41
“Rights and Responsibilities of the Individual” (RI)	100	73
Totals	839	683

The remaining consolidated requirements are reflected in the fall 2018 E-dition update and the 2019 hard copy publications of the *CAMH*.

For the most part, the deletions and consolidations fall into one or more of these categories:

- EPs that are similar to, implicit in, or duplicative of other existing EPs. For example, the fact that an organization is required to *have* a written policy implies the policy is also *implemented*; therefore, there is no need for two EPs to demonstrate this singular concept.

Part 1:

Prompts to Assess Your Standards Compliance

Prompts to Assess Your Standards Compliance

The following worksheets contain questions to prompt staff discussion in your organization regarding compliance with challenging areas in each of the standards chapters of the *2019 Comprehensive Accreditation Manual for Hospitals*. The questions target elements of performance (EPs) considered historically challenging or high risk or those focusing on risk areas related to the Focused Standards Assessment.

Throughout you will also find brief tips offering helpful compliance strategies. Note that these tips do not represent new accreditation requirements. They are intended to provide helpful strategies for standards compliance.

Accreditation Participation Requirements (APR) Compliance Prompts

Who is responsible for keeping the electronic application for accreditation (E-App) up to date? Has your account executive been notified of any changes within 30 days of the change occurring?

If your hospital uses deemed status, who is responsible for maintaining the Statement of Conditions™ when managing survey-related deficiencies? Have you confirmed that any time-limited waiver is being completed on time and properly managed?

Have any new locations or services been added recently? If so, has your E-App been updated? Has your account executive been notified within 30 days of the time the change(s) occurred?

Has the ownership, control, or capacity of the organization changed recently? If so, has your account executive been notified? And was this completed within 30 days of the time the change(s) occurred?

What process is in place to ensure that all accreditation information is kept current?

TIP: Consider conducting a “paper drill” to ensure that all required documents listed in the *Survey Activity Guide* (at http://www.jointcommission.org/organization_survey_activity_guide/) are easily located, retrievable, and current.

Have responsibilities for completing the Focused Standards Assessment (FSA) tool been determined?

How have the program-specific risk areas been incorporated into your intracycle self-assessment process?

Have you determined which option will be selected for submission of an FSA?

TIP: Ensure accurate and timely submission of information by planning ahead.

Are your ORYX® data stable or unstable? Are your data satisfactory?

TIP: If your organization is struggling with ORYX measures, consider visiting the Core Measure Solution Exchange® via your secure *Joint Commission Connect*® extranet site.

Where are official records or reports from licensing, examining, reviewing, or planning bodies stored?

TIP: Keep official records and reports of licensing, examining, reviewing, or planning bodies easily accessible, as surveyors may ask to review such documents.

How do staff, patients, or the public report concerns to hospital management about quality or safety?

TIP: Confirm that there is a process in place to notify the public about how to contact hospital management and The Joint Commission to report patient safety and quality-of-care concerns.

Do providers of care, treatment, and services know that concerns regarding the safety and/or quality of care provided in the organization may be reported to The Joint Commission without the threat of retaliation from the organization? Is there evidence showing that providers have received education about this?

TIP: Incorporate a method for staff to report concerns regarding safety or quality of care to The Joint Commission without retaliatory action from the hospital.

Environment of Care® (EC) Compliance Prompts

Did leadership identify at least one person to manage the environment of care program, pursuant to EC.01.01.01, EP 1?

Are there written management plans for the areas identified in Standard EC.01.01.01? Has the organization evaluated each of these plans in the past 12 months in terms of objectives, scope, performance, and effectiveness?

Are the implementation and results reported to the individual(s) responsible for environment of care activities?

How is the safety of outside grounds and equipment (that is, the physical environment) monitored? How are safety issues mitigated? Are results reported to the individual(s) responsible for environment of care activities? What resources are allocated for this purpose?

Is the smoking policy up to date and enforced as written?

Is there a documented and current inventory of all required hazardous materials and waste? Has the hospital documented the inspection and monitoring of all required hazardous gases and vapors?

Does the organization have accessible safety data sheets for all hazardous materials? Is there documentation of Department of Transportation training (every three years) for all staff authorized to sign manifests for all hazardous materials (in accordance with the Global Harmonized System [GHS]) and waste shipments?

Are all hazardous material and chemical containers (including secondary containers) labeled per the Occupational Safety and Health Administration's (OSHA's) requirements?

Is all personal protective equipment that is required for handling, storing, transporting, using, and disposing of hazardous materials available and maintained as required?

What is the organizational policy/procedure for handling, storing, transporting, using, and disposing of hazardous medications?

What is the organizational policy/procedure for monitoring radiation workers for radiation exposure?

What is the organization's policy/procedure for routine storage and prompt disposal of trash?

TIP: As part of the process for continually monitoring, internally reporting, and investigating, the organization should establish a process for evaluating hazardous materials and waste spills and exposures that may not have been previously identified. Also evaluate for policy compliance with managing such materials.

Is there a current, written fire response plan that describes the following?

- Specific roles of staff and licensed independent practitioners at and away from a fire's point of origin
- When and how to sound and report fire alarms
- How to contain smoke and fire
- How to use a fire extinguisher
- How to assist and relocate patients
- How to evacuate to areas of refuge
- Who is authorized to turn off the medical gas zone valve during an emergency

In addition, are staff and licensed independent practitioners periodically instructed on and kept informed of their duties under the plan?

Is a copy of the plan readily available with the telephone operator or security?

When were fire drills conducted over the past year? Were the drills conducted at varying times (with a difference of at least one hour) and under varying conditions? Were critiques completed as planned?

Fire Drill Date	Quarter	Shift (including day and time)	Critique Completed (Y/N)
Health Care Occupancy (<i>once per shift, per quarter</i>)			

Part 2: Compliance Assessment Checklist

Please note: The downloadable, fill-in checklists that appear in Part 2 are available via links on page 54 of this e-book.

Accreditation Participation Requirements (APR)

If you find that your organization is noncompliant with any applicable EPs, plot them on the following SAFER™ Matrix. For information on how to determine placement of an EP, *see* page vii in the Introduction.

		Immediate Threat to Life		
LIKELIHOOD TO HARM	HIGH (Harm could happen at any time)			
	MODERATE (Harm could happen occasionally)			
	LOW (Harm could happen but would be rare)			
		LIMITED (Unique occurrence that is not representative of routine/regular practice and that has the potential to impact only one or a very limited number of patients/visitors/staff)	PATTERN (Multiple occurrences of the deficiency, or a single occurrence that has the potential to impact more than a limited number of patients/visitors/staff)	WIDESPREAD (Deficiency is pervasive in the facility, or represents systemic failure, or has the potential to impact most or all patients/visitors/staff)
		SCOPE		

Standard APR.01.01.01		The hospital submits information to The Joint Commission as required.			
EP 1	<p>Does the hospital meet all requirements for timely submissions of data and information to The Joint Commission?</p> <p>Note 1: <i>The Joint Commission will impose the following consequence for failure to comply with this APR: If the hospital consistently fails to meet the requirements for the timely submission of data and information to The Joint Commission, the hospital will be required to undergo an Accreditation with Follow-up Survey. Failure to resolve this issue at the time of the Accreditation with Follow-up Survey may result in an accreditation decision change.</i></p> <p>Note 2: <i>The proposed consequences address only compliance with the requirement itself. They do not address the content of the hospital's submissions to The Joint Commission. For example, if information in a hospital's electronic application for accreditation (E-App) leads to inaccuracies in the appropriate length of the survey and a longer survey is required, the hospital will incur the additional costs of the longer survey. In addition, if there is evidence that the hospital has intentionally falsified the information submitted to The Joint Commission, the requirement at APR.01.02.01, EP 1 and its consequences will apply. (See also APR.01.02.01, EP 1)</i></p>				
Compliant?	Yes	No	Not scored	Not applicable	
<i>If insufficient compliance:</i>					
Likelihood to harm		Low	Moderate	High	Immediate threat to life
Scope of noncompliance		Limited	Pattern	Widespread	Immediate threat to life
Evidence of Compliance			Plan of Action		Due Date

KEY: © indicates that documentation is required;  indicates an identified risk

Standard APR.01.02.01		The hospital provides accurate information throughout the accreditation process.			
EP 1	Does the hospital provide accurate information throughout the accreditation process? (<i>See also</i> APR.01.01.01, EP 1)				
	<p>Note 1: <i>Information may be received in any of the following ways:</i></p> <ul style="list-style-type: none"> ■ <i>Provided verbally</i> ■ <i>Obtained through direct observation by, or in an interview or any other type of communication with, a Joint Commission employee</i> ■ <i>Derived from documents supplied by the hospital to The Joint Commission</i> ■ <i>Submitted electronically by the hospital to The Joint Commission</i> <p>Note 2: <i>For the purpose of this requirement, falsification is defined as the fabrication, in whole or in part, and through commission or omission, of any information provided by an applicant or accredited organization to The Joint Commission. This includes redrafting, reformatting, or deleting document content. However, the organization may submit supporting material that explains the original information submitted to The Joint Commission. These additional materials must be properly identified, dated, and accompanied by the original documents.</i></p>				
Compliant?	Yes	No	Not scored	Not applicable	
	<i>If insufficient compliance:</i>				
	Likelihood to harm	Low	Moderate	High	Immediate threat to life
	Scope of noncompliance	Limited	Pattern	Widespread	Immediate threat to life
Evidence of Compliance			Plan of Action		Due Date

Standard APR.01.03.01		The hospital reports any changes in the information provided in the application for accreditation and any changes made between surveys.			
EP 1	Does the hospital notify The Joint Commission in writing within 30 days of a change in ownership, control, location, capacity, or services offered?				
Ⓞ	<p>Note: <i>When the hospital changes ownership, control, location, capacity, or services offered, it may be necessary for The Joint Commission to survey the hospital again. If the hospital does not provide written notification to The Joint Commission within 30 days of these changes, the hospital could lose its accreditation.</i></p>				
Compliant?	Yes	No	Not scored	Not applicable	
	<i>If insufficient compliance:</i>				
	Likelihood to harm	Low	Moderate	High	Immediate threat to life
	Scope of noncompliance	Limited	Pattern	Widespread	Immediate threat to life
Evidence of Compliance			Plan of Action		Due Date

KEY: Ⓞ indicates that documentation is required; ■ indicates an identified risk

2019 Hospital Compliance Assessment Checklist

About the Book

With high-level compliance questions, checklists, and tracer tools, the *2019 Hospital Compliance Assessment Checklist* is a straightforward, hands-on resource for engaging staff and leadership in accreditation activities. This self-assessment workbook is designed to help organizations maintain continuous standards compliance and survey readiness. You have the option of reviewing high-risk or highly challenging topics in a given compliance area, or taking a more detailed look at individual elements of performance (EPs). The convenient compliance checklist includes ALL hospital standards and EPs, including those used for deemed status purposes and primary care medical home certification.

Special features include the following:

- **High-level compliance prompts and tips** to stimulate discussion on high-risk areas and to cultivate compliance strategies
- **Compliance assessment checklists** fully updated to reflect all hospital EPs effective January 1, 2019
- **SAFER™ Matrix** included with each checklist so you can track scope and likelihood to harm for noncompliant EPs, which will help you focus and prioritize follow-up activities
- **Tracer methodology overview, questions, and worksheets** provide a guide to conducting mock tracers to help your organization examine its current processes and promote survey readiness
- **Survey planning worksheets** to facilitate survey logistics preparation

About The Joint Commission

The Joint Commission is a private, not-for-profit organization dedicated to continuously improving the safety and quality of care provided to the public. The Joint Commission is the nation's principal standards setter and evaluator for a variety of health care organizations, including hospitals and critical access hospitals; ambulatory care, behavioral health care, and home care organizations; laboratories; nursing care centers; and office-based surgery practices.

About Joint Commission Resources

JCR is an expert resource for health care organizations, providing consulting services, educational services, and publications to assist in improving quality and safety and to help in meeting the accreditation standards of The Joint Commission.

JCR provides consulting services independently from The Joint Commission and in a fully confidential manner. Please visit our website at <http://www.jcrinc.com>.

Joint Commission Resources (JCR),
an affiliate of The Joint Commission,
is the official publisher and educator
of The Joint Commission.
