

The Joint Commission

Emergency Management Toolkit

Joint Commission Resources Mission

The mission of Joint Commission Resources (JCR) is to continuously improve the safety and quality of health care in the United States and in the international community through the provision of education, publications, consultation, and evaluation services.

Disclaimers

JCR educational programs and publications support, but are separate from, the accreditation activities of The Joint Commission. Attendees at Joint Commission Resources educational programs and purchasers of JCR publications receive no special consideration or treatment in, or confidential information about, the accreditation process. The inclusion of an organization name, product, or service in a JCR publication should not be construed as an endorsement of such organization, product, or service, nor is failure to include an organization name, product, or service to be construed as disapproval.

This publication is designed to provide accurate and authoritative information regarding the subject matter covered. Every attempt has been made to ensure accuracy at the time of publication; however, please note that laws, regulations, and standards are subject to change. Please also note that some of the examples in this publication are specific to the laws and regulations of the locality of the facility. The information and examples in this publication are provided with the understanding that the publisher is not engaged in providing medical, legal, or other professional advice. If any such assistance is desired, the services of a competent professional person should be sought.

Table of Contents

Access to the Digital Tools in This Book	v
Introduction	1
Section 1. Emergency Management Program and HVA Leadership Tools	3
Tool 1-1. Emergency Management Standards Compliance Assessment Checklist	4
Tool 1-2. Emergency Management Program Development Plan.....	21
Tool 1-3. Senior Leadership’s Role in Emergency Management Checklist	32
Tool 1-4. Senior Leadership Emergency Management Survey Readiness Assessment	35
Tool 1-5. Unified and Integrated Emergency Management Program	38
Tool 1-6. Hazard Vulnerability Analysis Policy	47
Tool 1-7. Hazard Vulnerability Analysis Development Checklist.....	52
Tool 1-8. Checklist for an Effective HVA Executive Summary.....	56
Tool 1-9. Building Community Relationships Checklist	57
Tool 1-10. 1135 Waiver Request Checklist.....	59
Tool 1-11. Emergency and Disaster Preparedness Evaluation Checklist.....	61
Tool 1-12. IT Outage or Cybersecurity Emergency Checklist	64
Tool 1-13. Checklist for Preparing for the Emergency Management Session.....	67
Section 2. Emergency Operations Plan (EOP) Tools	69
Tool 2-1. Emergency Operations Plan Assessment Checklist.....	70
Tool 2-2. Emergency Operations Plan	78
Tool 2-3. Health Insurance Portability and Accountability Act (HIPAA) Disclosure Decision Flowchart	91
Tool 2-4. Crisis Communications Checklist	92
Tool 2-5. Emergency Communications Procedures for Nursing Care Centers and Assisted Living Communities	100
Tool 2-6. Disaster Volunteer Procedure Checklist.....	105
Tool 2-7. Staff Anticipated Concerns During Emergencies Survey.....	107
Tool 2-8. Checklist for Staff Resiliency Aids and Assessment	111
Tool 2-9. Trauma Incident Protective Procedure Checklist.....	113
Tool 2-10. Potential Staff Post-Traumatic Stress Disorder Indications.....	115
Tool 2-11. Shelter Triage Form and Matrix	117
Tool 2-12. Home Care Patient Evacuation Tracking Form	119
Tool 2-13. Health Care Facility Evacuation Checklist.....	121
Tool 2-14. Family Reunification Plan Development Checklist.....	123
Tool 2-15. Active Assailant Response Training Checklist	128
Tool 2-16. Civil Unrest Policy Development Checklist.....	131
Tool 2-17. High-Consequence Infectious Disease Preparedness Checklist.....	133
Tool 2-18. Infectious Patient Surge Checklist	136
Tool 2-19. EM Checklist for Blood Products and Supplies	139
Tool 2-20. Utilities Failure Plan Assessment Checklist.....	141

Section 3: Continuity of Operations Planning, Disaster Recovery, and Hazard-Specific Tools	143
Tool 3-1. Continuity of Operations Plan (COOP) Development Checklist.....	144
Tool 3-2. Continuity of Operations Plan	146
Tool 3-3. Checklist for Safe Reopening of Health Care Facilities After an Emergency	151
Tool 3-4. Human-Caused or Technological Disaster Recovery Checklist	160
Tool 3-5. Natural Disaster Infrastructure Damage Assessment and Recovery Checklist	167
Tool 3-6. Mass Casualty Incident Response Plan.....	174
Tool 3-7. Wildfire Preparation, Response, and Evacuation Checklist.....	181
Tool 3-8. Hurricane Preparation, Response, and Evacuation Checklist	184
Tool 3-9. Tornado Preparation, Response, and Evacuation Checklist	189
Tool 3-10. Flooding Preparation, Mitigation, and Response Checklist.....	193
Tool 3-11. Earthquake Preparation, Mitigation, and Response Checklist.....	198
Tool 3-12. Respiratory Pathogen Pandemic or Epidemic Preparedness and Response Checklist.....	202
Tool 3-13. Bioterrorism Preparedness and Response Checklist	208
Tool 3-14. Nuclear or Radiological Emergency Preparedness and Response Checklist.....	212
Tool 3-15. Chemical Contamination Emergency Preparedness and Response Checklist	217
Section 4: Staff Training, Emergency Exercise, and Evaluation Tools	221
Tool 4-1. EM Training Program Assessment Checklist	222
Tool 4-2. Sample Emergency Response Training Program.....	225
Tool 4-3. Emergency Response Staff Training Checklist	229
Tool 4-4. Emergency Exercise Development Checklist	230
Tool 4-5. Mass Decontamination Training Outline.....	236
Tool 4-6. Threat Detection and Monitoring for Risk Reduction Training Outline.....	241
Tool 4-7. Exercise Plan	244
Tool 4-8. Part 1—Playbook: Cyberattack Tabletop Exercise	252
Tool 4-8. Part 2—Slide Deck: Cyberattack Tabletop Exercise Scenario	257
Tool 4-9. Active Attacker Drill Playbook.....	260
Tool 4-10. Infant Abduction Drill Playbook	265
Tool 4-11. Part 1—Playbook: Civil Unrest Tabletop Exercise.....	270
Tool 4-11. Part 2—Slide Deck: Civil Unrest Tabletop Exercise Scenario	273
Tool 4-12. Part 1—Playbook: Partial or Full Evacuation Tabletop Exercise.....	276
Tool 4-12. Part 2—Slide Deck: Partial or Full Evacuation Tabletop Exercise Scenario	280
Tool 4-13. Part 1—Playbook: Wildfire Tabletop Exercise.....	282
Tool 4-13. Part 2—Slide Deck: Wildfire Tabletop Exercise Scenario	286
Tool 4-14. Part 1—Playbook: Hurricane Functional Exercise.....	289
Tool 4-14. Part 2—Slide Deck: Hurricane Functional Exercise Scenario	294
Tool 4-15. After-Action Report Template.....	299

Emergency Management Program and HVA Leadership Tools

Per The Joint Commission’s revised “Emergency Management” (EM) chapter,* health care organizations (HCOs) need to have a comprehensive, unified emergency management (EM) program that provides a framework for shared decision-making, internal and external collaborations, and allocation of available resources (such as staff, space, and supplies) so that HCOs can effectively prepare for, respond to, and recover from any type of emergency (Standard EM.09.01.01). The importance of the hazard vulnerability analysis (HVA)—the thorough, evidence-based risk assessment that underpins all other aspects of the EM program—is emphasized throughout the EM standards (Standard EM.11.01.01).

The EM standards also clarify the role of senior leadership in emergency management (EM.10.01.01). This role includes designating an EM lead or coordinator, providing oversight and support for the EM program, deciding where to focus resources, reviewing after-action reports that evaluate EM exercises and responses to real emergencies, and determining EM-related performance improvement initiatives.

This section provides tools to help an organization’s senior leaders and EM manager comply with EM requirements and recommended practices for all accreditation programs. In addition, this section contains general tools to assist HCOs with emergency preparedness and response, as well as tools on HVA development.

* At the time of this book’s publication, the revised EM chapter had been implemented for hospitals, critical access hospitals, home care organizations, and (effective July 1, 2024) ambulatory care organizations and office-based surgery practices. Eventually, the revised EM standards will roll out to all accreditation programs. Always refer to the current standards for your program setting.

Emergency Operations Plan (EOP) Tools

Development of a comprehensive written emergency operations plan (EOP) is required of all Joint Commission–accredited health care organizations (HCOs). The EOP must be informed by the organization’s hazard vulnerability analysis and must include detailed policies and procedures to guide an HCO in responding to and recovering from a wide range of emergencies—a concept known as the “all-hazards approach” to emergency management.

Most of the tools in this section refer to the revised “Emergency Management” (EM) chapter.*

This section provides resources that focus on EOP development (Standard EM.12.01.01) and each of the six critical areas:

- Communications (EM.12.02.01)
- Staffing (EM.12.02.03)
- Patient care and clinical support (EM.12.02.05)
- Safety and Security (EM.12.02.07)
- Resources and Assets (EM.12.02.09)
- Utilities (EM.12.02.11)

Tools that reflect recommended practices, as well as Joint Commission requirements, are included.

* At the time of this book’s publication, the revised EM chapter had been implemented for hospitals, critical access hospitals, home care organizations, and (effective July 1, 2024) ambulatory care organizations and office-based surgery practices. Eventually, the revised EM standards will roll out to all accreditation programs. Always refer to the current standards for your program setting.

Continuity of Operations Planning, Disaster Recovery, and Hazard-Specific Tools

The Joint Commission’s revised “Emergency Management” (EM) chapter* emphasizes the need for a continuity of operations plan (COOP), which provides guidance on how the organization will continue to perform its essential business functions, deliver essential services, delegate authority, and implement succession plans when there has been a disruption to normal operations (Standard EM.13.01.01). The standards also require health care organizations (HCOs) to have a recovery plan that describes strategies, actions, and individual responsibilities necessary to restore the organization’s care, treatment, or services after an emergency or disaster incident (Standard EM.14.01.01).

Even if not currently required for an accreditation program, having a written COOP and a written recovery plan are best practices.

This section provides tools related to COOP development and recovery plan development. In addition, this section includes hazard-specific resources for organizations that have prioritized specific types of disasters, from flooding to wildfires, in their hazard vulnerability analyses. Many of these tools reflect recommended practices rather than Joint Commission requirements. However, they are useful to help ensure compliance with Joint Commission standards and elements of performance.

* At the time of this book’s publication, the revised EM chapter had been implemented for hospitals, critical access hospitals, home care organizations, and (effective July 1, 2024) ambulatory care organizations and office-based surgery practices. Eventually, the revised EM standards will roll out to all accreditation programs. Always refer to the current standards for your program setting.

Staff Training, Emergency Exercise, and Evaluation Tools

All Joint Commission–accredited health care organizations (HCOs) are expected to engage in staff training related to emergency management. In addition to providing training, they must conduct exercises to test and evaluate the organization’s emergency operations plan (EOP) and response procedures. The revised “Emergency Management” (EM) chapter* provides additional guidance—requiring a written education and training program (Standard EM.15.01.01), elaborating on what should inform emergency exercises (Standard

EM.16.01.01), and emphasizing the need to evaluate all components of the emergency management program (Standard EM.17.01.01).

The tools in this section, which reflect both requirements and recommended practices, are intended to help HCOs comply with Joint Commission training and evaluation requirements. The resources include a variety of sample scenarios for tabletop exercises, drills, and operations-based functional exercises.

* At the time of this book’s publication, the revised EM chapter had been implemented for hospitals, critical access hospitals, home care organizations, and (effective July 1, 2024) ambulatory care organizations and office-based surgery practices. Eventually, the revised EM standards will roll out to all accreditation programs. Always refer to the current standards for your program setting.
