

# E-dition Compliance Monitor<sup>®</sup> Plus (ECM<sup>®</sup> Plus)

Save Valuable Time Managing  
Your Health Care Regulations

A complex and ever-changing health care regulatory environment is forcing you and your team to do more with fewer resources. You are responsible for maintaining continuous compliance with multiple regulators with increasingly strict standards requirements. In addition, your team is expected to maintain optimal financial performance and provide exceptional care.

You need a tool that will allow you to spend more time on patient care rather than researching regulations from multiple entities. E-dition Compliance Monitor Plus (ECM Plus) is your cost-effective compliance tool. The ECM Plus software provides a single resource for key federal and state regulations and crosswalks these regulations to help you reduce risk, fill gaps in compliance, avoid fines, and save time.

This online tool is automatically updated daily as regulations are revised, and can save you hours of research time. You can:

- Create custom crosswalks of Joint Commission hospital standards and EPs to related CMS Conditions of Participation (CoPs), A-tags, state regulations, and NFPA codes
- Save, email, print, and export your crosswalks so you can easily share these with others in your organization
- Access full text regulations from major federal agencies and all 50 states
- Conduct powerful searches for specific regulations with a few simple clicks
- Readily access bookmarked regulations of particular interest to your organization
- Receive a daily list and email alert on regulations that apply to your organization and your state(s)

---

There are more pages of regulations for Medicare than in the Internal Revenue Service code, and the Medicare regulations are more complicated.<sup>1</sup>

---
